BUREAU OF THE CENSUS Richard M. Scammon, Director

SUMMARY REPORT

available on a commodity basis.

JUNE 1962

FOR RELEASE August 13, 1962

EXPORT TRADE BY COMMODITY

The Bureau of the Census, Department of Commerce, announced today that the slight increase in United States exports of domestic merchandise, from \$1,946.2 million in May to \$1,948.5 in June¹, reflected increases in exports of crude materials, finished manufactures and semimanufactures which were largely offset by the decrease in exports of crude foodstuffs. The June 1962 domestic merchandise export total was about 16 percent higher than the June 1961 total of \$1,678.3 million. These totals include data on Department of Defense Military Assistance Program—Grant-Aid shipments.

With Military Assistance Program—Grant-Aid shipments excluded, the June domestic merchandise export total amounted to \$1,872.2 million, slightly higher than the May total of \$1,866.1 million and about 15 percent higher than the June 1961 total of \$1,623.2 million.

Exports of <u>crude materials</u> rose from \$193.1 million in May to \$204.1 million in Jun owing chiefly to increases in exports of

¹ See the June 1962 issue of Report No. FT 900-E for seasonally-adjusted figures on total exports, excluding Military Assistance Program—Grant-Aid shipments. Seasonally-adjusted data are not

unmanufactured cotton, from \$50.4 to \$59.0 million; and unmanufactured tobacco, from \$22.2 to \$29.9 million. Exports of finished manufactures rose from \$1,153.6 million to \$1,162.6 million reflecting increases in exports of individual items included in this economic class as follows: construction, excavating, mining, oil field, and related machinery, from \$71.2 to \$84.0 million; railway transportation equipment, from \$71.2 to \$17.1 million; machine tools, including metal-forming machine tools, from \$32.9 to \$36.4 million; power generating machinery, from \$30.1 to \$32.2 million; trucks and busses, from \$22.7 to \$24.7 million; and paper and manufactures, from \$24.2 to \$26.0 million. However, a substantial decrease was reported in exports of aircraft, parts, and accessories, from \$149.8 to \$124.3 million. The advance in exports of semimanufactures from \$257.0 million in May to \$264.3 million in June was primarily due to the increase in exports of vegetable oils and fats, from \$1.5 to \$9.9 million. June exports of manufactured foodstuffs were valued at \$127.8 million, a level about the same as the May total of \$127.7 million.

The drop in crude foodstuffs from \$214.9 million to \$189.8 million resulted primarily from decreases in wheat from \$103.7 to \$87.6 million and corn, from \$52.1 to \$48.2 million.

EXPLANATION OF STATISTICS

COVERAGE: Export statistics include government as well as nongovernment shipments to foreign countries. The export statistics, therefore, include Department of Defense Military Assistance Program—Grant-Aid shipments (for which separate figures are shown in the footnotes of this report), Mataal Security Program economic assistance shipments, and shipments of agricoltural commodities under P.L., 480 (The Trade Development and Assistance Act of 1954, as amended) and related laws. (The separate information which is available on exports under P.L., 480 and related lawn may be obtained from the Economic Renearch Service and the Foreign Agricultural Service of the Department of Agriculture. Shipments to United States armed forces and diplomatic missions shrond for their own use are excluded from export statistics. United States trade with Paerto Rico and United States posnensions is not included in this report, but the export trade of Puerto Rico with foreign countries is included as a part of the United Staten export trade. Merchnodise shipped in transit through the United Staten between foreign countries, oot entered as imports, is not included in export statistics.

VALUATION: The valuation definition used in the export statistics is the value at the seaport, border point, or airport of exportation. It is based on the selling price (or cost if not sold) and iocludes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the United States port of exportation are excluded. None of the values have been adjusted for changes in price level.

RELIABILITY: The statintics presented to this report are based partly on sample data and therefore are subject to sampling variation that may cause them to differ somewhat from the resulta which would have been obtained from processing all export documents. For the figures shown in this report the sampling variability can be ignored since the probable variability due to sampling is either less than \$50,000 (the largest variation from rounding of figures) or lens than a trivial percentage of the individual totals shown. In addition to the effects of nampling variation, the data in this report are nubject to errors from such sources as the carry-over of data from month to month, errors in reporting or processing, the estimation of shipments valued under \$100 (estimated data for such shipments are included in the over-all export total and in the totals for "Finished manufactures" and "All other ficiabed manufactures, exclusive of Special Category Type 1" hut excluded from other totals), and the omission of parcel pont shipments valued under \$50. Although the effect of such errors on the rounded totals in this report in probably small, the possibility of insecuracy should be taken into account, particularly in using figuren of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precinion of export data in contained in the foreword of Report No. FT 410. For complete attachment, nee foreword in Foreign Commerce and Navigation of the United States.

USCONN-DO

Prepared in the Bureau of the Census, Foreign Trade Divinion

For sale by the Bureau of the Census, Washington 25, D.C. Price 10¢ per copy. Annual subscription (FT 900, 930, 950, 970, 975, 985, and 986 combined) \$5.00.

UNITED STATES EXPORTS OF DOMESTIC MERCHANDISE, BY ECONOMIC CLASSES AND LEADING COMMODITIES: JUNE 1962 AND SELECTED PERIODS

(Quantity in units indicated; value in millions of dollars. Figures for 1962 are as originally issued and have not been revised to include published corrections. Figures for 1961 include revisions published with the December 1961 reports, or earlier, but do not include revisions published during 1962. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts.)
